EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science, BCS

Expected Apr 2027

- **Awards:** Varsity Football Athletic Scholarship, President's Athlete Academic Honour Roll Distinction.

TECHNICAL SKILLS

Languages and Technologies: C++, C#, Python, JavaScript, TypeScript, PHP, HTML, CSS, SQL.

Frameworks and APIs: React, Redux, Node.js, Next.js, Express, ASP.NET, .NET MAUI, REST APIs, GraphQL.

Developer Tools and Cloud: Docker, Azure, Azure DevOps, Jira, Git, Linux, Bash, BASIC, Postman, Swagger.

Databases and Testing: MySQL, SQLite, xUnit, Jest.

EXPERIENCE

Junior Software Developer

May 2025 — Apr 2026

The Equitable Life Insurance Company of Canada

Waterloo, ON

- Developed back-end features for an eApp serving over **1 million clients** using **C#, ASP.NET**, and **SQL**, designing **REST APIs** and optimizing database queries to enhance application scalability and performance.
- Built **React, Redux, and TypeScript** front-end features and maintained **Docker CI/CD pipelines**, enabling automated testing, continuous deployment, and **100% test coverage** across through **xUnit and Jest**.
- Prototyped an **Azure OCR document-prefill system** that automated data extraction from scanned documents, reducing manual data entry by **13%**, improving data accuracy, and validating feasibility for production adoption.

Back-End Software Engineer

Sep 2024 — Dec 2024

Print + Retail Solutions, University of Waterloo

Waterloo, ON

- Designed and shipped **Node.js and Docker middleware** integrating Shopify **GraphQL APIs**, reducing product export processing time from **3 hours to 5 minutes (36x faster)**, and enabling automated daily exports.
- Automated data export pipelines using **Bash and BASIC**, enabling the successful migration of the company's online store from **Magento to Shopify** with improved data validation, consistency, and error handling.
- Configured and troubleshooted **10+ Linux point-of-sale and network systems** to ensure seamless operation during live retail events, improving system uptime by **15%** and reducing onsite tech support needs.

Full-Stack Web Developer

Jan 2024 — Apr 2024

Print + Retail Solutions, University of Waterloo

Waterloo, ON

- Redesigned multi-step form workflows used by **1300+ faculty members** using **HTML, CSS, JavaScript, PHP**, and **SQL**, reducing submission errors and improving usability.
- Refactored legacy export pipelines using **Bash and BASIC**, increasing export speed by **25%** and improving data accuracy through validation and error-handling enhancements.
- Improved back-end reliability by **30%** by independently debugging and rewriting **20+ SQL and BASIC scripts**, supporting inventory and e-commerce integrations.

PROJECTS

trackr — Finance Tracker | C#, .NET MAUI, SQLite

Apr 2025 — Aug 2025

- Built a cross-platform mobile app using **MVVM architecture** to track balances and transactions across banks.
- Designed a configurable CSV parser supporting **5+ financial institutions** with flexible schema mapping.
- Added **SQLite storage** for fast on-device data access and persistent offline data, eliminating repeated user setup.

VRToShopify — Middleware Automation | Node.js, Docker, MySQL

Sep 2024 — Dec 2024

- Developed **containerized Node.js middleware** integrating Shopify **GraphQL APIs** for automated imports.
- Reduced bulk import processing time by **36x** through pipeline refactor and **MySQL schema optimization**.
- Implemented validation and cleansing scripts removing **200+ malformed records**, improving data reliability.

Chess Engine | C++

Jul 2024 — Sep 2024

- Developed a **C++ chess engine** with 2 students using object-oriented design and **MVC architecture**.
- Implemented AI opponents using **search algorithms and evaluation heuristics** for multiple difficulty levels.
- Added **25+ gameplay and engine features**, improving move generation, rule handling, and strategic depth.
